NEXT, LIGHT OR DARK?

```
.theme-light {  
  (color designs for light theme will go in here)  
}  
  
.theme-dark {  
  (color designs for dark theme will go in here)  
}
```

PICK A PALETTE, AND STICK TO IT

```
.theme-light {  
  --color001: #hex;  
  --color002: #hex;  
  --color003: #hex;  
  --color004: #hex;  
  --color005: #hex;  
  --color007: #hex;  
}
```

add more, or use less. color001-7 can be changed to whatever you want, and add '-dark' to the dark palette color names under .theme-dark or just keep numbering in a sequence that is not the exact same name as the ones under .theme-light

While still within these parameters of either .theme-light or .theme-dark, use the following;

  border: 2px dashed var(--interactive-accent);
}

/* Drop Target Indicator */
.workspace-drop-indicator {
  background-color: var(--interactive-accent);
}

```

Practical Examples

```

/* Make active tab header match accent color */
.workspace-tab-header.is-active {
  background: linear-gradient(135deg, var(--interactive-accent), var(--text-accent));
  color: var(--text-on-accent);
  border-bottom: 3px solid var(--interactive-accent);
}

/* Rounded corners on workspace leaves */
.workspace-leaf {
  border-radius: var(--radius-m);
  overflow: hidden;
}

/* Gradient title bar */
.titlebar {
  background: linear-gradient(135deg, var(--background-secondary), var(--interactive-accent));
  color: white;
}

/* Hide status bar */
.status-bar {
  display: none;
}

/* Make sidebar icons glow on hover */
.workspace-ribbon .clickable-icon:hover {
  color: var(--interactive-accent);
  text-shadow: 0 0 8px rgba(var(--interactive-accent-rgb), 0.5);
}

```

```
/* Different background for left vs right sidebar */
.mod-left-split .workspace-leaf-content {
  background-color: rgba(var(--background-primary-rgb), 0.98);
}

.mod-right-split .workspace-leaf-content {
  background-color: rgba(var(--background-primary-rgb), 0.95);
}

/* Highlight active pane with border */
.mod-active .workspace-leaf {
  border: 2px solid var(--interactive-accent);
}

/* Make resize handles more visible */
.workspace-leaf-resize-handle:hover {
  background-color: var(--interactive-accent);
  transition: all 0.2s ease;
}
```

USEFUL CSS SELECTORS COMPILATIONS

```
/* Active file in file explorer */
.nav-file-title.is-active,
.nav-folder-title.is-active {
    /* styles */
}

/* Hover states */
.nav-file-title:hover,
.nav-folder-title:hover {
    /* styles */
}

/* Workspace tabs */
.workspace-tab-header.is-active {
    /* styles */
}

/* Status bar items */
.status-bar-item.mod-clickable:hover {
    /* styles */
}

/* Code blocks */
.markdown-preview-view pre,
.markdown-source-view pre {
    /* styles */
}

/* Blockquotes */
.markdown-preview-view blockquote {
    /* styles */
}

/* Callouts */
.callout {
    /* styles */
}

/* Task list items */
.task-list-item-checkbox {
    /* styles */
}

/* Internal links */
.cm-hmd-internal-link,
.internal-link {
    /* styles */
}

/* External links */
.external-link {
    /* styles */
}
```

```

/* Unresolved links */
.cm-hmd-internal-link.is-unresolved,
.internal-link.is-unresolved {
  /* styles */
}

```

Accent Presets

Essentially recoloring your established color names. Changes the elements those colors are being used by. Can use all in your palette or just do a few. Can make MANY different accents.

```

/* Default Accent */
body.accent-default {
  --color001: #40abd9;
  --color002: #6bc8ff;
  --color003: #5140b0;
  (add more here)
}

/* Purple Glow Accent */
body.accent-purple {
  --color001: #9d6bff;
  --color002: #c49dff;
  --color003: #7a42ff;
  (add more here)
}

```

Then, add to your Styles Settings area in your CSS. Here you can name them whatever you want. Be sure to create a label for each preset you have.

```

-
  id: accent-presets-header
  title: 🌀 Accent Presets
  type: heading
  level: 1
  collapsed: false
-
  id: accent-preset
  title: Quick Accent Preset
  description: Instantly change the theme's mood
  type: class-select
  allowEmpty: true
  default: accent-purple
  options:
    -
      label: '🟦 Default Blue'
      value: 'accent-default'
    -
      label: '💜 Purple Glow'
      value: 'accent-purple'

```
